

Diagnostic Imaging to Meet Your Needs

Undergoing construction? Faced with a weather emergency? Need to reduce backlog due to higher patient volumes? Shared Imaging provides **mobile, modular or interim** solutions to diagnostic imaging centers. With advanced CT, MRI, PET/CT and Women's Health imaging technology from the OEM of your choice, we offer a customized imaging solution allowing you to achieve an optimal level of service.

Understand Your Options

Mobile/Modular

Experiencing capital and/or spatial constraints that are limiting capabilities? With **no build-out required**, a mobile/modular solution is an ideal way to improve imaging services without making a significant capital investment.

Interim

Facing a disruption in service or a need for a short-term imaging solution? An interim solution allows facilities to **maintain their current volume** while they remodel, replace, repair or upgrade their current technology.

When is it Time for an Extension of Your Facilities Suite?

Address Patient Backlogs - Reduce patient backlog and avoid expensive downtime from construction or expansion constraints

Grow Patient Volume - Whether on-site or at a new location, mobile medical coaches allow capital to flow-in while you build-out

Test Your Market - Determine if the need is there before permanently expanding services or adding new service lines

Maintain Imaging Services - Continue providing services during equipment upgrades, facility rebuilds or weather emergencies

The SHAREDIMAGING® Solution

High-end technology
from most OEMs

Flexible deal
structures to meet
changing needs

All-inclusive
monthly fee turning
technology costs
into an
operational expense

Site planning
assistance to address
patient workflow
and facility design
needs

Clinical support
and training
for your staff

24x7 Call Center
provides maintenance
and service for both
the coach and system

Exterior and interior
customization
to match provider
branding and enhance
patient experience

A Success Story

High Quality, Cost-Effective, Convenient Care

NEEDS

Access for growing population
In-house expansion not financially feasible
Minimal operational burden to existing staff

SOLUTION

7 mobile medical coaches - 3 MRI, 3 CT & 1 PET/CT
Clinical staffing
Regular maintenance & OEM technical service
Ongoing operational oversight

Quality Care
Close to Home

Access to
High-End Technology

Lower Costs
for the Clinic & Patients

Efficient Process
Operational Oversight
